Note: Railway haul outs must be arranged a minimum of one-week in advance.

TRAVEL- LIFT

- 25 Ton Capacity
- Max beam: 15' 5"
- Max draft : 7'

Note: Travel Lift Haulouts are tide-dependant

BOOTHBAY HARBOR DETAIL

4 Boat Handling in Boothbay Harbor

There are several boatyards (and many homeowners with docks of their own) that line the shoreline along this protected harbor. It is extremely important to monitor your wake once you are abeam of Tumbler Island to avoid aggravating our neighbors and damaging their boats and property. Please notice the NO WAKE buoys as you pass Tumbler Island and reduce speed, speed and wake are tightly controlled once inside the inner harbor. Remember that you are responsible for your wake and any damage it creates.

5 Contacting the Yard Prior to Arrival

Prior to your arrival at the yard, please make sure you have confirmed the date and time with your service manager so that we can prepare for your arrival. Please contact your service manager so that he/she can prepare to assist you with docking. If unable to reach your service manager, please call the office at (207) 633-3171 during working hours. If unable to contact the office, please contact General Manager Dennis Gunderson at (339) 793-1467.

6 Tying Up Your Boat

You will be provided with instructions on docking prior to arrival. Please reference our "Boothbay Yard- Waterfront and Dock Layout" below, with the dock and slip numbers (1-4). Your service manager will provide a slip location in advance of your arrival.

6 Tying up to your Mooring

You will be provided with instructions on your mooring prior to arrival. Please reference our "Boothbay Yard- Mooring Layout" below. Your service manager will provide a mooring number/ coordinates in advance of your arrival.
